INCLUDING STATEMENT OF VERIFICATION**

In response to the Notification of Defective Response of April 3, 2006, Applicants submit this corrected Sequence Listing. While the sequences have not been changed, the description of the features (<220>) has been supplemented to indicate that the artificial sequences were derived from human and animal adenovirus peptide sequences. It is believed that this amendment complies with the defects indicated in the Notification.

In accordance with 37 CFR 1.821(f) and 1.825(a), it is hereby certified that the appended computer readable form of the Sequence Listing (1.821(e)) is identical to the paper copy of the Sequence Listing that is part of the specification (1.821(c)).
